How to… find and read an e-Book

1. Hover your mouse over Search Collections in blue bar at top of screen under KRS banner to bring up menu.

2. Choose e-Books in pop-up menu. The e-Book access screen should look like this:

3. To browse e-Book titles in a subject area, view the subject areas listed under Browse e-books by subject in the pull down (v) menu and click the subject area of your choice, and then choose Search.

To find a specific e-book, type the main words in the title into the search bar and then choose Search.
If the book you are looking for does not come up in the list, check to make sure you typed the title in correctly. Try different spellings (such as *pediatric* and *paediatric*) and word endings (such as *geriatric* and *geriatrics*) if your book doesn't come up immediately. The search will only retrieve exact results.

If your title is correct, then we most likely do not have that e-Book. You can go to the main KRS page [http://krs.albertahealthservices.ca](http://krs.albertahealthservices.ca) and Request a book. A KRS staff member will work to find a copy of the resource for you.

4. Once you have located an e-Book you wish to read click the blue link under the book title and author information. The next screen should open your e-book to the first page. Look for a Table of Contents on the left side of the screen.

5. To read the e-book, click on sections in the table of contents to see different chapters and subsections. Each e-Book provider's platform may look slightly different.
